

Turn Some Heads™

Advertise your Site with an Audio Song Bench™

With a custom background graphic in a busy location

Get Attention and Boost Attendance!

Comes to life with music, sound effects, or narration when a guest is seated!

- Now you can add fun and excitement with animal sound effects, interesting facts, or even promote coming events and attractions at your zoo! Many great stock graphics available or use your own.
- Our **Kidsensor™** capacitive sensors detect a person through the wooden seat to activate MP3 stereo sounds from our **Sound Byte Player™** MP3 audio player. Each seat has its own fixed or rotating sound tracks and can even attract attention with a special timed mode that activates when idle for a length of time. A removable SD Flash Memory Card allows easy updating of sound tracks or modes of operation with a personal computer.
- **Audio Song Bench™** is constructed using an incredibly durable South American hardwood called IPE ("eepay") and has a powder coated steel frame with weatherproof enclosures.

AN EXCITING ADDITION TO ANY AQUARIUM, ZOO, MUSEUM, OR PARK!
